

Quest 1: The Tutorial Quest

Cut along the lines. Hide in order. Clue 1 goes to Hudson directly.

PROJECT OLYMPUS · QUEST 1 · CLUE 1 of 4

There are 86,400 seconds in a day. Divide by 3,600. Where in the house do you see that number every single day?

Hours. Think about where you check them.

PROJECT OLYMPUS · QUEST 1 · CLUE 2 of 4

$2^5 = ?$ Water does something important at this many degrees Fahrenheit. Go where that happens.

Cold.

PROJECT OLYMPUS · QUEST 1 · CLUE 3 of 4

$12^2 \div 12 = ?$ They come in cartons of exactly this many.

Breakfast.

PROJECT OLYMPUS · QUEST 1 · CLUE 4 of 4

$(3 \times 10^2) \div (5 \times 10^1) = ?$ A cube has this many faces; the game version has dots. The box is with the games. The lock wants the last digit of your first three answers (or the full numbers, on a dial).

Roll for it.
