

Quest 2: The Cartographer's Quest

Cut along the lines. Hide in order. Clue 1 goes to Hudson directly.

PROJECT OLYMPUS · QUEST 2 · CLUE 1 of 4

Solve $5x - 8 = 252$. A full deck has exactly this many. The next clue is in the deck.

Shuffle.

PROJECT OLYMPUS · QUEST 2 · CLUE 2 of 4

$y = 3x + 2$. Find y when $x = 8$. The alphabet has this many letters, and they're all in one heavy book on the shelf.

A to Z.

PROJECT OLYMPUS · QUEST 2 · CLUE 3 of 4

$x + y = 730$ and $y = x$. Find x . Every one of those is a square on the wall. Look at this month.

Days.

PROJECT OLYMPUS · QUEST 2 · CLUE 4 of 4

$2x + y = 12$ and $x - y = 0$. Find x . The car has this many. So does the box's hiding place. The lock wants the last digit of your first three answers.

Round and round.
